

# What is a Cookie?

## FUNCTION

Cookies are data files that allow smooth navigation between websites, return to previous site activities, save site user preferences, and connect user's browser with the web server.

## THREAT

Cookies have access to user data that can be used by third parties and other organizations to track users and collect sensitive data without their knowledge and permission.

## SOLUTIONS

- Disable third-party cookies in your browser's settings.
  - Use an Ad-blocker.
  - Use your browser's "Incognito Mode".
  - Ask a Librarian!
