

PERSONAL INTERNET SECURITY

w/ Librarian Megan

WEB ACTIVITIES

When determining how to make your web presence more secure, it helps to think through what you are currently using, and what your concerns are. Please:

- Write down the various web based things you do regularly.
 - Do you use email a lot?
 - Do you engage on social media, or just watch?
 - Do you conduct business online?

WEB INTERACTIONS

Now that you have thought about what you are currently doing, please brainstorm about who sees those things you do.

- Add to your original list:
 - Do you use email a lot? **Who sees your emails?**
What service do you use?
 - Do you engage on social media, or just watch?
Who sees your posts? Who are you connected to?
 - Do you conduct business online? **Who sees your activity?**

WEB CONCERNS

Now think about your concerns related to these things.
Add to your original list:

- Do you use email a lot? **Who sees your emails? What service do you use?**
 - *Who should not see your emails? Why not?*
- Do you engage on social media, or just watch? **Who sees your posts? Who are you connected to?**
 - *Would it be bad if someone else saw your posts? Why?*
- Do you conduct business online? **Who sees your activity?**
