

THREE FACTS ABOUT

FACIAL SURVEILLANCE

1

Facial surveillance is an emerging class of at-a-distance surveillance that represents an imminent threat to our civil rights. It's here now; being used by police in secret and unregulated.

2

Facial surveillance produces false positives, indicating the inherent racial, gender, and age biases of the algorithms that powers this technology. It's dangerous regardless of how well it works.

3

Facial surveillance technologies subject our communities to constant scrutiny as if in a perpetual police line-up.

GET INVOLVED

WHAT CAN I DO?

- ☒ Be ready to fight for your privacy.
- ☐ Contact your local, state, and national officials and tell them you support joining other cities in banning the government use of facial recognition technology.
- ☐ Join local efforts to resist with Fight for the Future's map of facial recognition surveillance and resistance: <https://www.banfacialrecognition.com/map/>
- ☐ Support your local ACLU in their efforts to pass facial recognition moratorium and ban legislation around the country.
- ☐ Get in touch with the Library Freedom Project to have Privacy Advocate librarians teach your local community how to fight this technology.
